

FOR IMMEDIATE RELEASE

Top Android Games Launching With Support For MOGA™ Mobile Gaming System

Woodinville, WA. – December 21, 2012 – More Android games are now being released simultaneously with support for the MOGA™ Mobile Gaming System by PowerA™. Gameloft's *Modern Combat 4: Zero Hour*, Rockstar's *Grand Theft Auto: Vice City* and SkyVu Entertainment's *BATTLE BEARS ROYALE* recently released on the Google Play store with MOGA support built right into the game. Gamers with a MOGA can download and immediately play those games with precision control that is usually only reserved for console gamers. With *Modern Combat 4: Zero Hour*, for example, using the "iron sight" button on MOGA improves gameplay and can increase a gamer's performance.

Since being released in October, new games have been added to the system, with key titles in every major gaming genre. MOGA Enhanced titles that recently released, or will be available by the end of the year include:

- *Modern Combat 4: Zero Hour* (Gameloft)
- *BATTLE BEARS ROYALE* (SkyVu Entertainment)
- *Grand Theft Auto: Vice City* (Rockstar)
- *Wild Blood* (Gameloft)
- *Dead Trigger* (MADFINGER Games)
- *Jet Set Radio* (SEGA)
- *NFL Pro 2013* (Gameloft)
- *Tiki Kart 3D* (Arb Studios)
- *Expendable Rearmed* (Retrobomb)
- *The Bard's Tale* (inXile Entertainment)

"With the recent launch of *Modern Combat 4: Zero Hour*, gamers are provided with some of the most high-quality and immersive gaming experiences currently available on mobile," said Baudouin Corman, Gameloft VP of Publishing for the Americas. "And when paired with the MOGA Mobile Gaming System, Android gamers can now also enjoy the pleasures of a true console-like gaming controller."

"*BATTLE BEARS ROYALE* is our #1 game and it's all about intense real-time multiplayer action packed with hilarious comedy," says Ben Vu, Co-Founder & CEO of SkyVu Entertainment. "Our millions of core fans are extremely competitive. MOGA allows gamers to play better while keeping their thumbs off the glass to provide a full view of the action."

MOGA was released on October 22, 2012 to critical acclaim, and has attracted support from top mobile developers and publishers who want to bring console-like precision and control to their Android phone and tablet-based games. Gameloft, Ratrod Studios, Ezone, Namco Bandai, SEGA, Ayopa Games, Vector Unit and other acclaimed publishers have developed MOGA Enhanced blockbuster titles such as *The Dark Knight Rises HD*, *N.O.V.A. 3*, *Sonic CD*, and *Dungeon Hunter 3*. New game titles, developers and publishers are coming on board each month. For a complete list of games that support MOGA, visit www.PowerA.com/MOGA.

MOGA combines three key innovations into a single powerful system. The MOGA Controller is the first state-of-the-art, full-featured controller designed specifically for mobile devices. Pocket-sized, portable and connected via *Bluetooth*® wireless technology, the MOGA Controller features the controls that mobile gamers and developers demand: dual analog sticks, two shoulder buttons, four action buttons and standardized start and select buttons. In addition, the MOGA Software Development Kit (SDK) provides mobile game developers greater precision, robust control and enhanced display abilities while enabling fast, efficient development of rich new game titles and MOGA enhancement of existing titles. Finally, the MOGA™ Pivot App enables gamers to easily browse, find and play a list of MOGA Enhanced Games in

one convenient location. MOGA Pivot App is available free via Google Play.

The MOGA system supports Android 2.3 (Gingerbread) and higher mobile devices. MOGA is now available for an estimated retail price of \$49.99 USD at Best Buy, Walmart, Toys"R"Us, Fred Meyer, Gamestop, T-Mobile, AT&T, Verizon and a nationwide network of additional retailers and carrier stores. It is also available through Amazon and PowerA.com.
